## Director's Message.....

### IMPORTANCE OF UNIFORM AND DISCIPLINE IN HIGHER EDUCATION

Dear Students!

Discipline means the willing submission of a person to rules, regulations and instructions to someone recognized by society. It is a willing and polite discharge of one's duty towards others in society. Discipline must be observed by everyone of us in all walks of life. One should be disciplined whether at home, in school on the play ground, on duty, in the office or in the army. Discipline is a virtue. It provides mental strength to discriminate good from the bad and to defend the right against wrong.

Only a serious and self disciplined student achieves something worth in the life. In disciplined students just wander here and there, waste away their precious time and energy in useless activities and later on repent in life. They will soon learn that there is no shortcut to success and it is only through consistent hard work and self discipline that they can achieve their objective in life.

Uniforms for students in higher education have ever remained a highly debatable topic among parents, students and educators. The significance of implementation of dress code in colleges has been brought under scanner time and again. There are many convincing pros and cons for proper uniforms. The basic idea behind college uniform is that it creates equality amongst students and helps to prevent conflict. Basically, uniform/ dress code serves the purpose of being a disciplinary tool. It accurately reflects discipline standard and represents in which college a student goes.

No college can function effectively without a disciplined student body and uniform plays a vital role in achieving so. A college may produce excellent result academically but slovenly dressed students leave not so effective impression on others. While, neatly dressed uniformed children undoubtedly suggest that the college is good.

#### Positive impacts of uniform/ dress code

- Wearing proper uniform has many positive effects in a child's life from promoting discipline to inculcating feelings of belongingness; uniforms aids in the development of a child. It further mushrooms the feeling of unity among students in the college.
- A proper uniform also saves students from putting their fashion tastes before their learning. Also, it takes the pressure off the children to look fashionable along with other students.
- Uniform symbolizes equality and serves as a great leveler making every child look equal. Use of uniforms in colleges ensures less competition and less distractions. Uniform gives children a common identity and a sense of belongingness.
- For safety reasons also uniforms are good. It makes it easier for educators to identify their students who are dressed alike and keeps students safe from outsiders. Identifying potential threat from interlopers becomes easier.

Therefore, be dressed, disciplined, devoted and dedicated to reach the desired destination.

As you are soon going to appear in your end semester exams, I wish you all the best!

May God Bless you.

### ROLE OF A CIVIL ENGINEER

A civil engineer is responsible for planning and designing a project, constructing the project to the required scale, and maintenance of the product. A civil engineer requires not only a high standard of engineering knowledge but also supervisory and administrative skills. The planning part of their work involves site investigation, feasibility studies, creating solutions to complications that may occur and the actual designing of structures. He may have to work with the guidelines of the local government authority and get plans approved by the relevant authority. He may prepare cost estimates and set construction schedules. Construction work involves dealing with clients, architects, government officials, contractors and the supervision of work according to standards. Their work also involves the maintenance and repair of the project.

The major specializations within civil engineering are structural, water resources, environmental, construction, transportation, geo-technical engineering etc. On most projects, civil engineers work in teams or in coordination with many other engineers. We can witness in our country the development of roads, buildings and other structures. The main intention behind this is to not only make the lives of people easier and secure, but also to beautify our surroundings in a stronger and better way. For the successful completion of all the aforementioned jobs, specialists in civil engineering are needed.

Due to the increase in construction sites in our country, the demands for civil engineers are high as well. This can also be one of the reasons why students of today are opting for civil engineering.

Career opportunities for these professionals are available with firms of both the private and public sectors. Besides this, job opportunities are obtainable for them abroad too. With the recent boom in the construction industry, the infra structural growth within the country has gone up. The career scopes for civil engineers are many and they can get very lucrative careers.

### BLUETOOTH TECHNOLOGY

In an attempt to standardize data transfer and synchronization between dissimilar mobile devices in the short-distance range, Intel and Microsoft established in 1998 a major industry consortium that included IBM, Toshiba, Ericsson, Nokia, and Puma Technology.

Code-named Blue Tooth for the 10th century Danish king who unified Denmark, the companies have created a single synchronization protocol to address end-user problems arising from the proliferation of various mobile devices -- including smart phones, smart pagers, PDAs, handheld PCs, copiers, printers, notebooks, and many future digital appliances at home, that need to keep data consistent from one device to another.

The proposed Bluetooth solutions (hardware and software-based) would automatically synchronize mobile devices when end-users enter their offices or home. Intel and others are designing the sending and receiving radio frequency chip sets. Price point for hardware is in \$5-20 range eventually.

Since the start of this initiative in 1998, interest in Bluetooth has grown tremendously - signified by 1800 members of Bluetooth consortium by mid 2000.

While Bluetooth consortium demonstrated prototype products in the 1999-2000, there are no production-quality end user products using blue tooth technology as of now, as far as we know. Component products (radios and chips) that can be integrated into finished products have started becoming available from Ericsson and others. However, here is an opportunity for more

start-up companies. IrDA is a competing technology and has been implemented in many products for over 6-7 years now but BlueTooth has a few distinct advantages - with Ericsson/Microsoft/Intel team behind it. In our opinion, there are relative benefits with several competing technologies - there is some overlap too. Let competitive products thrive so that we the users get the best solutions.

### LIFE

The moment when parents hold their baby in their arms for the first time, they wonder how such a tiny living thing could create so many emotions within them. And they are also surprised that they have actually brought such a tiny, beautiful being into this world. With all the emotions they start expecting from their child that he will fulfill their dreams by becoming a sensible person. They manage money and all the best possible things for their child to give him happy and healthy life.

With the growth of the child grows the expectations of the parents, but when the child break their expectations, they totally break down. Forgetting our parents' expectations we start spoiling our lives by chewing tobacco, drinking liquor, smoking cigarette and also by taking drugs. Friends this life is not only ours it is the life of our parents, by our parents and also for our parents. Our first and the foremost aim should be to keep up to the expectations of our creators on earth i.e. our parents. We must in our wildest dreams should not even think of doing any such act that hurts their feelings, because by hurting them we are indirectly aching God.

Think on it friends.

### BUGATTI VEYRON EB 16.4

The Bugatti Veyron EB 16.4 is a mid-engined grand touring car, developed by German manufacturer Volkswagen Group, and produced by French marquee Bugatti. It was first introduced in 2005.

The Super Sport version of the Veyron is the fastest road-legal production car in the world, with a top speed of 431 km/h. The original version has a top speed of 408.47 km/h. It was named Car of the Decade (2000-2009) by the BBC television programme "TOP GEAR". The car is named after French racing driver Pierre Veyron, who won the 24 hours of Le Mans in 1939 while racing for the original Bugatti company. The 16.4 refers to 16 cylinders and 4 turbochargers.

The transmission is a dual-clutch direct-shift gearbox computer-controlled automatic with seven gear ratios, with magnesium paddles behind the steering wheel and a shift time of less than 150 milliseconds. A replacement transmission for the Veyron costs just over US\$120,000. It uses special Michelin PAX run-flat tyres, designed specifically to accommodate the Veyron's top speed, which cost US\$25,000 per set. The tyres can be removed from the rims only in France, a service which costs US\$70,000.

ENGINE: The Veyron Super Sport features an engine power increase from the standard 1,001 metric horsepower (736 kW; 987 bhp) to 1,200 metric horsepower (883 kW; 1,184 bhp) and torque of 1,500 N·m and a revised aerodynamic package.

BRAKING: The Veyron's brakes use cross drilled, radials vented carbon fibred reinforced silicon carbide(C/SiC) composite discs. The fronts have eight titanium pistons and the rear calipers have six pistons an anti-locking braking system(ABS) has also been installed on the handbrake. The rear wing also acts as an airbrake, providing an additional 6.66 m/s<sup>2</sup> of deceleration. Bugatti claims the Veyron will brake from 400 km/h to a standstill in less than 10 seconds, though distance covered in this time will be half of a kilometer.

### KEY TO DETERMINATION OF GOAL

If you keep positive attitude at each and every subject before beginning of any work, then all possibilities of difficulties looks like easy and you do work easily. In another aspect if you keep negative attitude at each and every subject then you face more difficulties and want to separate from each and every difficult situation. So attitude of nature in your life should be positive.

For determination of career, you should have positive thinking, patience, self confidence, truthfulness in your life.

Small tasks done on daily basis fill up the lake of your goal.

Every small task done in life like a small step taken forwards success, hence do not be indifferent towards them create interest in every activity you do. Align every action with your goal.

When you want to discipline yourself, take one step at a time. Things cannot change overnight. Also never make the mistake of comparing your goal with that of others. This will only harm your interests. Though you may take inspiration from others. Before deciding a goal, understand your present conditions, strength, capacity and facilities available to you. Always respect your words and mean to honour it.

Be committed to your goal and aspire to achieve big. Whenever you achieve something, you can always say that you could have achieved more. Whatever your thought was less, much more could have been achieved. Problems start popping up the moment your focus diverts your goal.

Do not determine your goal based on your past life. Decide your goal after thinking through all your possibilities. The secret of determination can be learnt from the lives of the winners. All winners have certain qualities common in them no matter which period or in which field they have achieved. Attitude determines success of goal.

William James of Harvard University once said "The greatest discovery in my generation is that human beings can alter their lives by altering their attitude of mind".

Three 'E' factors are important to determine our attitude - Environment, Experience and Education. Our behaviour changes according to our experience with various people.

Goal leads to success. Without goal there is no success. If there comes a goal in our mind it must be real. In other words - we must be positive.

Triple 'D's are important, we talk about success i.e. Decision, Determination and Destiny. Decision determines destiny.

Besides the usual five senses, a successful person has a sixth sense i.e. commonsense. It is thousand times better without education than to have education without commonsense.

than to have commonsense  
commonsense.

### BEST PERSON YOU CAN BE

In the beginning, the Pencil Maker spoke to the pencil, saying, "There are five things you need to know before I send you out into the world. Always remember them and you will become the best pencil you can be".

**First:** You will be able to do many great things, but only if you allow yourself to be held in someone's hand.

**Second:** You will experience a painful sharpening from time to time, but this is required if you are to become a better pencil.

**Third:** You have the ability to correct any mistakes you might make.

**Fourth:** The most important part of you will always be what is inside.

**Fifth:** No matter what the condition, you must continue to write. You must always leave a clear, legible mark no matter how difficult is the situation. Promising to remember, the pencil went into the box fully understanding its Maker's advise. Similarly, if you remember the following and act accordingly, you will become the **best person you can be.**

**First: You will be able** to do many great things, but only if you allow yourself to be held in God's hand and allow other human beings to approach you for the many gifts you possess.

**Second: You will experience** a painful sharpening from time to time, by going through various problems, but you will need it to become a stronger person.

**Third: You will be able** to correct mistakes you might make or grow with them.

**Fourth: The most important part** of you will always be what is inside.

**Fifth: On every surface you walk**, you must leave your mark. No matter what the situation, you must continue to serve God in everything. Everyone is like a pencil created by the Maker for a unique and special purpose.

By understanding and remembering this, let us proceed with our life on this earth having a meaningful purpose in our heart and a relationship with God.

You are made to do great things!

**Dr Manoj Bhatnagar**  
Asso Prof, School Of Mngt

### ANTI STRESS CAMPAIGN

1. Get Started on Your Anti Stress Campaign Now. As with any bad habit, it is very easy to put off doing anything about it. Thus, most people never do anything about their bad habits other than give them a passing thought now and again. Treat your stress as a bad habit, but get stuck into beating it now.

2. Use Positive Thinking as a Stress Busting Support Aid You have probably heard of positive thinking, you may even have done something about it at some time. Positive thinking can be a strong support aid for your anti-stress campaign. Once you realize stress can easily be beaten, and you determine to do so, your positive thoughts about being a success in reducing stress will ensure that you do so. As far as possible, only associate with positive people, read inspirational and positive books and magazines. Seek out those who seem relaxed, confidence and very successful, and learn how they do it. Keep away from negative moaners, they drag you down.

3. Learn to Relax Properly to Beat Stress Learning to relax at any time, and in any place, is a powerful aid to overcoming any stress problem you may have. It will also help your health and prevent stress in the future. Practice some home relaxation techniques and also try yoga sessions. Yoga really is a wonderful way to learn how to relax properly and get your breathing right. It will also get you into a peaceful environment with the right type of positive people to assist you in beating stress.

4. Giving Back and Helping Others. Many people find that helping others on a regular basis reduces their own stress. This is because their focus is changed outwards and there is no time to look inward with any self pity and aggravate that stress.

5. Laughter Really is the Best Stress Buster. You have probably heard this a million times: laughter is the best medicine. It is also a marvelous way of reducing stress. The oxygen is pumping round your body and there is not a stressful thought or feeling in your body.

oxygen is pumping round your body and there is not a stressful thought or feeling in your body.

### EXAM TIME -DO'S AND DONT'S

It's exam time, and for many students that means long days, late nights and lots of coffee. It's easy to let the anxiety get to you, so what can you do to cope with exam tension? Here are 5 tips to help combat stress and ensure you have the best chance at acing your exams:

1) Don't cram at the last minute - Cramming at the last minute is the worst way to keep yourself from stressing out. When you cram, you're likely to panic and start worrying that you won't have enough time to study everything you need to. "Time management is key." Structure your study time, set priorities and prepare study notes.

2) Get plenty of rest- Sleep has major effects on learning, memory and efficiency, but it's often overlooked during exam season. Be sure to get between seven and eight hours of rest each night, and avoid common sleep stealers: caffeine, nicotine and alcohol.

3) Eat healthy- There is a link between food and stress, but most people find their eating habits worsen during times of tension like eating lots of junk food, but try to stay away from the junk and eat healthier foods instead. You'll have more energy and generally just feel better.

4) Get some exercise- During the frequent breaks you should be taking between study sessions, try getting some exercise, as physical activity can actually help re energize the body and keep you from burning out. Go for anything that gets you moving: going to the Gym, jogging, dancing or organizing a game of pickup hockey or basketball.

5) Do something fun - It's easy to forget about yourself when you're trying to memorize the notes, but you can't neglect your own needs. Take a few minutes to listen to music, take a walk or watch that hilarious video on YouTube.

"Laughter is your body's natural stress-release mechanism."

Good luck is always welcome.

But now you know how to make luck less important when preparing for exams and working towards your life goals.

## GRE- A GATEWAY TO GRAND SUCCESS

GRE, acronym of "Graduate Record Examination" is most widely accepted "graduate admissions test" worldwide can bring you one step closer to achieving your career goals. There has never been a better time to take one test that gives you more opportunities for your future. GRE is chiefly a multiple-choice test. The GRE scores have to be submitted by students aspiring for admission in international graduate school for their Graduate program, equivalent to the Post Graduate program of India.

There are two versions of the GRE (1) GRE – General (2) GRE - Subject

(1) GRE - The General GRE consists of 3 sections — (a) The Verbal (b) Quantitative (c) Analytical writing .

(2) GRE - Subject - Mainly includes the Questions relating to the subject opted for specifically.

GRE is conducted on two versions: 1. Paper and 2. Online

The students have the choice of taking GRE either on paper or online.

Analytical writing section helps to determine the students writing and analyzing skills. There are two parts in this section that needs to be answered by the students. First part has to be finished in 45 minutes. The student has to write an essay on the issue of a give topic. The second part deals with analysis of an argument and needs to be completed within 30 minutes. Of the 3 sections the writing test is the first to be taken. The student is allowed to take the GRE only once in a month and a total of 5 times in one year period.

Who Conducts It ?

Prospective graduate and business school applicants from all around the world Conduct the GRE General Test. Applicants come from varying educational and cultural backgrounds. The Test provides a common measure for comparing candidates' caliber & competence.

GRE scores are used by admissions or fellowship panels to supplement your undergraduate records, recommendation letters and other qualifications for (post) graduate-level study (offered under 10+2+4 years of minimum education basis) from any of the recognized Universities.

When and Where are these conducted ?

The GRE General Test is available at about 700 test centers in more than 160 countries. In India test conducts mainly in Ahmadabad; Allahabad ;Bangalore; Calcutta; Chennai; Gurgaon; Hyderabad; Mumbai; New Delhi; Trivandrum and others, the computer-based test is available on a continuous basis throughout the year. In areas of the world where computer-based testing is not available, the test is administered in a paper-based format up to three times a year in October, November and February.

# QUIZ : GRE MODEL

Speed (53%) & Accuracy (47%) are of essence

**Note :** Choose the right option. Mark(s) of each question is mentioned in the bracket at the end.

Q.1. Sentence Completion; Every sentence given below has one or may be two blanks; Beneath the sentence are set of words or four options given. Select the particular word or set of words from every blank that perfectly fits the meaning of the sentence as a whole. (1x4=4)

- In spite of her age, she has a childish and ---- sense of humor.  
(A) Adolescent (B) Trivial  
(C) Mature (D) Youthful
- At the cutting edge of research, scientists are developing new sunscreens to protect people from harmful----  
(A) UV rays (B) Pollution  
(C) Environment (D) Atmosphere
- There are lenders, though, that understand the value of credit counseling and will be willing to finance a loan once you have been ---- paying on your program for ---- one or two years, provided you meet their  
(A) Profit - Slight (B) Successfully - At least  
(C) Good - Least (D) Usefully - Smallest

Q.2 Analogy ; Which word completes completely with the analogies? (2x4= 8)

- Month: March  
(A) Play: Shakespeare (B) Cinema: Name  
(C) Novel: Title (D) City: Tokyo
- Bench: Stool  
(A) Room: Veranda (B) Cup: Saucer  
(C) Yardstick: Foot rule (D) Table: cupboard
- Money: Misappropriation  
(A) Writing: Plagiarism (B) Gold: Theft  
(C) Confidence: Deception (D) Germ: Diseases
- Tooth: Gum  
(A) Chest: Ribs (B) Bone: Joint  
(C) Heart: Aorta (D) Eye: Socket

Q.3 Quantitative Section : Quantitative Comparison, In this section there are two quantities. You need to determine the relation between the two quantities. (2x5=10)

- Both Tom and Mike started from the same point and covered a distance of 100 miles. Tom is driving at the speed of 25 miles per hour, while Mike is driving at the speed of 40 miles per hour. Determine who reached first.  
(A) Tom came first (B) Both reached at the same t  
(C) Mike reached first (D) No Action
  - Quantity A: 5/125; Quantity B: 0.35/7  
(A) 1 > 2 (B) 2 > 1  
(C) No relation between 1 & 2 (D) Both quantities are equal
  - X = the number of hours in 5 days ; Y = the number of seconds in 2 minutes  
(A) Y > X (B) X > Y (C) No relation between X & Y (D) X = Y
  - A = 6-3/28 ; B = 7/8 + 2/64  
(A) B > A (B) A > B (C) No relationship between A and B (D) A is equal to B
  - A = the number of months in 8 years ; B = the number of days in 14 weeks  
(A) A > B (B) A = B (C) B > A (D) No relation between A and B
- Q.4 Data Interpretation, The questions given below should be answered based on the given table: (3x5= 15)

Company	Model	Expected Launch	Project		S. P. of Vehicle (Rs. Lakh)
			Cost (Rs. Crore)	Annual Capacity	
TELCO	Safari	January 98'	400	5000	7.5
TELCO	Mint	October 98'	1700	25000	2.5

Company	Model	Month	Cost (Rs. Crore)	Annual Capacity	S. P. of Vehicle (Rs. Lakh)
Hyundai	D'Santro	September 98'	750	20000	3.0
Fiat	Palio	March 98'	640	16000	3.2
Honda	City	April 98'	800	8000	6.5
Mitsubishi	Lancer	June 98'	900	6000	7.0
Kinetic	Small Car	September 98'	540	12000	1.2

Assume that all the vehicles produced are sold and assume that production rates are uniform. Extra information: The raw material cost of the vehicle is 30%, the taxes are 10% and the production cost is 10% of the selling price. The remaining is the profit made by the manufacturer.

- If Fiat's Palio is launched at its scheduled time, by when should they be able to break even?  
(A) September 2002 (B) March 2001  
(C) April 2004 (D) December 2002
  - What part of the cost of project is not obtained for Mitsubishi after 15 months of sales of the Lancer?  
(A) 50% (B) 42% (C) 32% (D) None of the above
  - Kinetic small car will be able to cover what percent of the cost of project after a complete year?  
(A) 13.33% (B) 28.50% (C) 12.52% (D) 9.6%
  - Immediately after breaking even, Honda install ASB kits on its City model. This requires an additional Rs. 40 crore towards the project cost. At the same time the selling price of the car is increased by Rs. 50000. At the end of an entire year from then, what is the point that Honda's city makes?  
(A) 410 crore (B) 580 crore (C) 120 crore (D) 240 crore
  - A year after the launch of Lancer, Mitsubishi decides to launch a new model using the same assembly line. The line is capable of providing twice the production capacity as that of the Lancer, while the new car will be sold at half the price of the Lancer. What will be the ratio of annual profits of the Lancer to those of the new model, if the initial cost incurred for the new model is ignored?  
(A) 1:5 (B) 2:6 (C) 8:3 (D) 1:1
- Q.5 Analytical Reasoning, Five persons are sitting in a line. One of the two persons, at the farthest ends, is sharp, the other one is fair. An overweight person is sitting to the right of a feeble person. A tall person is to the left of the fair person and the feeble person is sitting between the sharp and overweight persons. (2x5= 10)
- Tall person is at which place counting from right?  
(A) First (B) Second (C) Third (D) Fourth
  - Which of the following depicts the person to the left of feeble person?  
(A) Sharp (B) Overweight (C) Fair (D) Tall
  - Which of the following persons is sitting in the middle?  
(A) Fair (B) Overweight (C) sharp (D) Tall
  - To whose left is the overweight person sitting?  
(A) Fair (B) Sharp (C) Tall (D) Feeble
  - If the fair person and overweight person swap their position, so also tall and feeble, then who will be sitting to the left of the feeble person?  
(A) Tall (B) Fair (C) Overweight (D) Sharp
